

AEO and AI-search visibility lead with 15 years building, ranking and monetising websites across agency, consulting and owned-portfolio work. I make brands findable, understandable and citeable across Google Search, AI Overviews, ChatGPT, Perplexity, Copilot and Gemini, connecting classic SEO fundamentals (crawlability, entity clarity, topical authority, structured data) with the AI-visibility layer of answer-first architecture, citation gaps and brand-consensus signals.

The work is measurable: in the last 3 months my owned portfolio pulled **4,200+ sessions from AI assistants** (GA4-verified), up from a near-zero base a year ago, with AI-sourced traffic converting on sites that track key events. At Figment Agency I lead AEO/GEO strategy across a 13-client book and built the agency's AI-visibility framework from zero. Alongside this I run a 44-site owned portfolio, have shipped programmatic platforms up to 27,000+ pages, and build supervised agentic SEO workflows on Claude, Codex, Astro, Cloudflare and GitHub. A 12-year B2B sales background means I run SEO against pipeline, retention and revenue, not vanity rankings.
