PROFESSIONAL SUMMARY

Senior SEO and AI-search visibility consultant with 15 years building, ranking and monetising over 200 websites across agency, consulting and a live owned portfolio. I make brands findable, understandable and citeable across Google Search, AI Overviews, ChatGPT, Perplexity and Copilot, connecting classic Search Engine Optimisation (SEO) fundamentals (crawlability, technical SEO, topical authority, structured data and content strategy) with the answer-engine layer of citation-gap analysis, entity optimisation and brand-consensus signals.

Currently lead AEO/GEO and technical SEO strategy across a 14-client agency book, having built the agency's AI-visibility framework from zero. I run SEO against pipeline, retention and revenue, supported by a 12-year B2B sales background. In 2026 alone I built five sites from scratch to 81,700+ quarterly visits, 593k Google impressions and 3,322 AI-assistant referrals, all measured live in Google Analytics 4 and Google Search Console.

SELECTED ACHIEVEMENTS

- Built and ranked five niche sites from scratch in 2026, generating 81,700+ visits and 593,000 Google impressions in Q2 alone, every figure pulled live from GA4 and Google Search Console.
- Grew a single YMYL health site from 41 to 4,361 monthly sessions in one quarter (8,501 Q2 visits, 99,170 impressions).
- Captured 3,322 AI-assistant referrals across the portfolio in Q2 2026 (ChatGPT ~91% share); on one finance site, 32% of all visits came directly from AI assistants.
- Delivered +236% estimated organic traffic in 12 months for a top agency client (Ahrefs), with several accounts more than doubling after onboarding.
- Drove +41% organic clicks for an aesthetics clinic and moved an orthotics client from average position 24.9 to 13.3 with a +25% click-through rate, over six months.
- Earned 924 AI citations for a single client campaign across all seven major AI engines (ChatGPT, Perplexity, Gemini, Copilot, Google AI Overviews, Google AI Mode and Grok).
